XEIN DENIEL M. VIRGINES

Full-Stack Engineer | Technical SEO Engineer

xeind.net xd@xeind.net linkedin.com/in/xeind github.com/xeind +63 908 912 3673 Philippines

Experience

Full-Stack Engineer | **Pioneer Dev AI** Dec 2025 – Present

- Owned frontend infrastructure and team code standards; did 30+ code reviews in a 4-person Agile team

MatchGuarantee | TypeScript, Astro, Cloudflare Workers, Queues, D1, GoHighLevel, OpenAI

- Built AI call summaries from JustCall webhooks via Cloudflare Queues and OpenAI into GoHighLevel
- Enriched leads with Census income benchmarks from 33,774 D1 rows, synced to 14 GoHighLevel custom fields
- Synced leads to the CRM and Meta Conversions API with SHA-256 hashed PII and browser/server event dedup
- Enforced a 72-hour booking notice on all 5 calendar endpoints and sent silent booking failures to Sentry
- Ran an A/B/C landing-page test, recording each lead's design in D1, Amplitude, Meta, and GoHighLevel

Yield Food Intelligence | TypeScript, React, Remix, Prisma, Redis

- Built dark mode system from scratch, defining design tokens across tables, dialogs, sidebars, and operator views
- Indexed Prisma queries and cached lists, cutting lookups 5-10s to 100-200ms and 20,000-row loads by 60%

FilipinaMeet / **SlavicMeet** | TypeScript, React Router, Node.js, Fastify, Prisma, PostgreSQL

- Migrated 206 files from Remix v2 to React Router v7 and Prisma v6 to v7 with a Vitest regression test suite
- Rebuilt landing pages from Webflow to Astro on multi-brand architecture for 70,000+ users
- Fixed recurring explore outages by de-indexing 1,459 crawled pages and caching the loader server-side

Technical SEO Engineer | **Chozi** Sep 2026 – Present

- Doubled Google-indexed pages from 5.4K to 11.4K and grew search impressions 85% over the prior 28 days
- Built programmatic browse pages by canton, district, property type and price band: 5,100 URLs, cross-linked
- Launched English /en pages in an inherited Next.js App Router codebase, with hreflang pairs in every sitemap
- Templated titles and meta from listing data: over-long titles 1,929 to 21, short descriptions 3,151 to 18
- Shipped a linked JSON-LD graph for listings, agents and agencies, four new sitemaps, and IndexNow submission
- Fixed soft 404s on removed listings; found a server memory leak (0.48 MB per render) through heap snapshots

Full-Stack Developer – Intern | **ChatGenie** Aug 2025 – Sep 2025

- Built GraphQL and REST APIs in Ruby on Rails and integrated Vue.js components for AI-driven client workflows

Developer – Intern | **Creative Dynamix Solutions, Inc.** Aug 2024 – Sep 2024

- Engineered finance module features in X++ (C#/SQL blend) within Microsoft Dynamics 365
- Automated address synchronization across forms and enforced safe record deletion in custom modules

Skills

Languages: TypeScript, JavaScript, Python, Lua, Go, SQL
Frontend: React, Next.js, Remix, React Router, Astro, Tailwind CSS
Backend: Node.js, PostgreSQL, Prisma, Cloudflare D1, Redis, Fastify, GraphQL
Tools: Git, Docker, Cloudflare Workers, Fly.io, GitHub Actions, CI/CD, AWS, Sentry, Vitest, Playwright
SEO & Analytics: Search Console, Ahrefs, Screaming Frog, Lighthouse, JSON-LD, GA4, Tag Manager, Amplitude

Projects

vallow.nvim | Lua, Neovim, Go Jun 2026 – Present

- Selected for Claude for Open Source by Anthropic, granting Max 20x access to open-source maintainers
- Built a Neovim plugin surfacing dead code, duplicates, and complexity from the fallow static-analysis CLI
- Rewrote as a standalone Go and Bubble Tea TUI, dropping the Neovim dependency and adding unit tests

Education

Polytechnic University of the Philippines – Manila 2021 – 2025
Bachelor of Science in Computer Science Magna Cum Laude
DOST-SEI S&T Undergraduate Scholar (RA 7687)

DEP Engineering Program – Data Engineering Pilipinas Jun – Dec 2026
Open Track Builder: Python and SQL pipeline on 65 years of World Bank data Selected 1 of 50

Bataan National High School 2019 – 2021
Senior High School, STEM With Highest Honors
